God in the Landscape: Studies in the Literary History of Australian Protestant Dissent by Dr Kerrie Handasyde

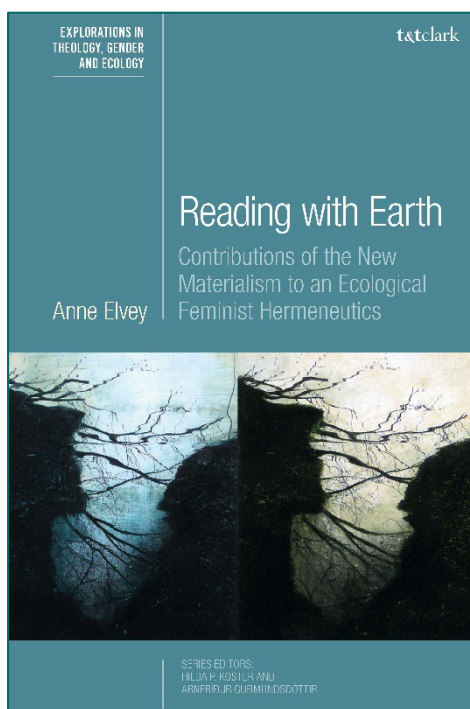

God in the Landscape draws the links between landscape, literature, and spirituality with imagination and insight and is an important contribution to the historical study of religion and the environment.

‘Kerrie Handasyde’s historical work is fascinating in its focus on fiction, poetry, novels, travel writing and dramatic performance, rather than denominational histories, to get inside the lived experience of Protestant Dissent.’ – *Professor Glen O’Brien, Eva Burrows College, University of Divinity*

‘Kerrie Handasyde has made a distinctive contribution to Australian religious and literary historiography.’ – *Reverend Dr Max Vodola, Catholic Theological College, University of Divinity*

Reading with Earth: Contributions of the New Materialism to an Ecological Feminist Hermeneutics by Dr Anne Elvey

‘Elvey combines analysis with creativity, complexities with poetry, nuance with passion. This work challenges, inspires and exhorts us to change and to imagine the future of our world differently.’ – *Dr Elizabeth Dowling, Biblical Scholar, Australia*

‘This work builds upon the ecological hermeneutic of the Earth Bible project, while drawing also from feminist theological readings, the new materialism, Indigenous scholarship and activism, and poetry, all in the service of reading Luke “with the Earth.” This is a sophisticated, passionate, and timely reading. The Earth cries out, and Elvey enables us to hear these cries.’ – *Professor Shelly Matthews, Brite Divinity School, USA*
